

Protecting people at the speed of AI

Reduce false positive alerts by optimizing existing security systems

At Actuate, we understand that the safety of people is of the utmost importance in any environment.

That's why we are committed to providing solutions that keep people safe, without compromising their privacy. Our technology is designed to accelerate security response time and improve safety outcomes by helping organizations detect and respond quickly to potential threats with AI. We are passionate about providing innovative AI solutions that enhance and align with existing safety and security measures.
